#### Description

It would be nice if pure IMAP clients (eg. Thunderbird or OUTLOOK in IMAP mode) could have the option to unsubscribe folders like "Contacts", "Tasks", "Calendar", "Notes" (more generally every folder which is not of type MAIL) to ease the reading of folder tree from items which anyway could not be handled by the client.

I understand IMAP service could be coupled to SWA but anyway this task should be taken into account.

#### History

##### #1 - 09/15/2016 12:49 PM - Prakash Nikhar

Tried to unsubscribe from special folders on outlook and Thunderbird over an IMAP connection but scalix doesn't allow.  
@SA Is there any other way to unsubscribe specific folders ?

Thanks !
