Target version:	12.7		
Operation System:	noarch package		

Description

Currently in case when scalix mail server integrated with AD/kerberos, all options in SAC becomes grayed and unavailable. So there is no way to enable/disable ActiveSync. Also there is no way to enable it via AD GUI extension, since there is no such option and actually no such attributes in schema. So the only way left to do this is via command line with ommodu (which is not suitable for customers).

History

#1 - 08/02/2017 02:08 AM - Alexey Bobyr

SAC - enable / disable AS for synced from external directory.
build - scalix-sac_12.6.1.14747.
